

# **Industrial Partnerships**

## **Industrial partnerships**

In 2010, OCP joined with top ranking partners in order to enhance our world-class industrial organization.

### **JESA**

Major industrial projects carried out by OCP require cutting-edge project management and engineering. JESA (Jacobs Engineering SA), a joint-venture between OCP and Jacobs Engineering, a global leader in engineering, was created for this purpose.

### **DuPont OCP Operations Consulting**

Industrial excellence cannot be achieved without safety and control. In order to strengthen our leadership in safety matters, OCP partnered with DuPont in 2013, a world leader in the industry, to create “DuPont OCP Operations Consulting”, a joint-venture dedicated to industrial performance. This alliance aims to help OCP reach world-class levels of safety, performance and sustainable development.
