

Industrial Partnerships

Industrial partnerships

In 2010, OCP joined with top ranking partners in order to enhance our world-class industrial organization.

JESA

Major industrial projects carried out by OCP require cutting-edge project management and engineering. JESA (Jacobs Engineering SA), a joint-venture between OCP and Jacobs Engineering, a global leader in engineering, was created for this purpose.

DuPont OCP Operations Consulting

Industrial excellence cannot be achieved without safety and control. In order to strengthen our leadership in safety matters, OCP partnered with DuPont in 2013, a world leader in the industry, to create “DuPont OCP Operations Consulting”, a joint-venture dedicated to industrial performance. This alliance aims to help OCP reach world-class levels of safety, performance and sustainable development.
